SUMMARY

Highly accomplished React Native Developer with 5 years of experience building scalable, high-performance cross-platform mobile applications for Android and iOS. Proven expertise in modern mobile architectures including React Native's New Architecture (Fabric & TurboModules), Redux Toolkit, and RTK Query. Possesses a strong foundation in full-lifecycle app development, performance optimization, and enterprise-level ERP integrations using NetSuite SuiteScript. Adept at end-to-end production deployments, native module integrations, and thriving in Agile environments. Seeking to leverage combined expertise in mobile development and NetSuite solutions to drive impactful projects.

SKILLS

Languages & Frameworks: React Native, TypeScript, JavaScript, Redux

Mobile Development: Android, iOS, Cross-platform

Backend Integration: REST APIs, GraphQL, WebSocket

AI/ML Integration: AI-powered features, Posture Detection, Computer Vision

Tools & IDEs: VSCode, Android Studio, Xcode, Figma, Cursor AI

Version Control: GitHub, GitLab, Bitbucket

Cloud & Services: Firebase, Google Cloud

Testing: Jest, Detox, SonarQube

UI/UX: Tailwind CSS, Material Design, Responsive Design

DevOps: CI/CD, Crashlytics

Project Management: Jira, Agile Methodologies

Other: Payment Gateway Integration, Maps (Mapbox)

EXPERIENCE

React Native Developer & NetSuite Developer Nov 2025

Ignitive Software Labs

- Developed and deployed AI-powered, highly optimized mobile applications for Android and iOS using React Native, focusing on performance and scalability.
- Engineered core features, integrated complex REST APIs, and implemented real-time functionalities, enhancing user engagement.
- Leveraged React Native's New Architecture (Fabric & TurboModules) to deliver production-ready, high-performance applications.
- Significantly improved development efficiency and code quality by utilizing Cursor AI, Claude Code, and modern tooling.
- Implemented secure authentication, deep linking, push notifications, and payment gateway solutions, prioritizing seamless UI/UX.
- Managed CI/CD pipelines, automated testing, and executed smooth App Store and Play Store releases, ensuring timely delivery.

NetSuite Technical Consultant (Contractual Role) Oct 2024 - Oct 2025

Prateek Technosoft India Pvt Ltd

- Developed and customized enterprise-level ERP solutions using SuiteScript 2.x (User Event, Client, Scheduled, and Suitelet scripts), optimizing business processes.
- Engineered end-to-end Bank Integration modules within NetSuite, automating payment processing, EFT, and real-time bank reconciliation, reducing manual effort by X%.
- Designed and implemented complex automated workflows for Order-to-Cash (O2C) and Procure-to-Pay (P2P) cycles, resulting in a Y% reduction in manual processing time.
- Built custom multi-level Approval Matrix Workflows and transaction validation rules to enhance financial data integrity and auditability.
- Developed tailored Suitelets and custom forms for syncing banking data, generating advanced PDF/HTML templates, and displaying dynamic KPI dashboards for financial tracking.
- Collaborated with business stakeholders to translate financial and banking requirements into scalable technical NetSuite configurations, ensuring alignment with business objectives.

React Native Developer May 2022 - Nov 2023

OneRoof Technologies LLP

- Developed cross-platform mobile applications using React Native with robust REST API integration and state management via Redux.
- Integrated Google Maps, real-time chat functionalities, secure authentication flows, and push notifications to enhance user experience.
- Implemented reusable UI components, responsive design principles, and media handling features, improving code maintainability and visual appeal.
- Focused on performance optimization and debugging to significantly improve overall user experience and application responsiveness.
- Contributed to the development of Solvekar, Roadmap App, and Grocery App, implementing booking flows, dynamic data handling, cart & checkout, and payment integration features.

React Native Developer Mar 2022 - May 2022

Dollop Infotech

- Designed and engineered high-performance cross-platform mobile applications for Android and iOS using React Native and TypeScript.
- Implemented secure end-to-end Payment Gateway Integrations, ensuring seamless and encrypted transaction processing for commercial checkout funnels.
- Developed real-time Chat Applications featuring instant messaging, push notification delivery systems, and multi-media file handling.
- Integrated complex RESTful APIs and managed predictable, synchronized application states using Redux Toolkit and Context API, ensuring data consistency.
- Implemented real-time location-based tracking and interactive maps utilizing Google Maps API, enhancing user navigation and functionality.
- Engineered highly responsive UI layouts and reusable components, focusing on performance optimization and smooth user navigation.

React Native Developer Jul 2020 - Mar 2022

Techsolvo LLP

- Programmed mobile applications combining React Native with native Android (Java) modules for maximum platform compatibility and performance.
- Executed complex React Native version upgrades on legacy codebases, improving application security and boosting performance by X%.
- Developed robust offline support, data caching mechanisms, and localized storage to ensure seamless performance under low network conditions.
- Handled core debugging, runtime crash fixing via Firebase Crashlytics, and managed weekly production-ready releases to the Google Play Store.
- Integrated third-party libraries, push notifications, and Firebase services to enhance application functionality and user engagement.

PROJECTS

- Hourflux | Ignitive Software Labs:** Contributed to the development of mobile applications featuring Google Maps integration, real-time chat, secure authentication, and push notifications. Implemented reusable components and responsive UI, focusing on performance optimization and debugging to enhance user experience. Key contributions included booking flows, dynamic data handling, cart & checkout, and payment integration for Solvekar, Roadmap App, and Grocery App.
- Shivangi TMT | Ignitive Software Labs:** Developed the core client interface for a specialized B2B mobile application for a leading steel bar manufacturer. Built a responsive product catalog and an automated inquiry management system, optimizing data rendering and heavy-list scrolling for zero-latency access to structural product data by field distributors.
- HcMate | Ignitive Software Labs:** Engineered a cross-platform Human Capital Management (HCM) mobile application integrated with SuiteHCM. Developed a unified workspace for employees and managers to process leave requests, handle document requests, track attendance, and execute multi-level operational approvals. Built responsive UI components with real-time notification synchronization and persistent local state management.
- East India Pharmaceutical (PharmaOps ERP) | Prateek Technosoft India Pvt Ltd:** Programmed robust SuiteScript 2.x modules for a NetSuite ERP optimization system tailored for pharmaceutical operations. Automated regulatory inventory checks, custom transaction controls, and batch tracking validation, reducing manual ledger overhead and ensuring absolute data integrity.
- Rudraksha Ratna E-Commerce | OneRoof Technologies LLP:** Leveraged React.js to build modular, high-performance UI components for a high-traffic e-commerce web platform. Integrated comprehensive e-commerce capabilities, including advanced catalog filters, localized payment flows, and structured checkout funnels.
- Apex Match (Project Management Application) | OneRoof Technologies LLP:** Architected real-time chat modules using WebSockets, developed push-notification architectures, and structured matching algorithms for a project synchronization application facilitating client-vendor matching, resource allocation, and communication.
- ICICI Lombard Meeting Digitizer | OneRoof Technologies LLP:** Developed a front-end infrastructure with custom fluid layouts for a corporate meeting management and enterprise scheduling mobile solution. Automated agenda scheduling, secure access management, and live calendar tracking to optimize professional workflows.
- Solvekar | Dollop Infotech:** Programmed end-to-end booking flows, structured calendar scheduling views, and integrated dynamic data-handling modules for a healthcare and utility appointment booking application. Architected core cart & checkout funnels integrated with secure payment systems for appointment deposits.
- Global Super Market | Dollop Infotech:** Integrated location-based mapping APIs, optimized deep-nested list rendering for products, and engineered reliable local caching mechanisms for a modular bulk e-commerce application supporting hyper-local grocery deliveries and synchronized offline/online inventory tracking.
- Happy Wedding | Techsolvo LLP:** Engineered multi-step user onboarding flows, real-time messaging capabilities, and interactive multimedia gallery interfaces for a wedding event management platform offering live booking services and interactive vendor directories.
- Kwick Charger | Techsolvo LLP:** Integrated real-time Google Maps tracking, configured secure payment processing APIs for instant recharges, and built background tracking features for an IoT-connected smart application to help users discover nearby EV charging infrastructure and manage charging sessions.
- Fashion App | Techsolvo LLP:** Handled UI layout implementation, localized state persistence, and continuous feature integration for twin flagship mobile applications focused on rapid product discovery, retail e-commerce, and stylized catalog indexing. Resolved critical interface bugs to lower cart abandonment rates.
- EduAcademy (Udemy Clone) | Techsolvo LLP:** Programmed resilient multimedia streaming modules, built offline download caching capabilities, and handled cross-platform view scaling for a full-featured educational technology platform facilitating video streaming, interactive quizzes, and course progression tracking.
- EmpMonitor Mobile (EMS) | Techsolvo LLP:** Designed secure background telemetry systems to track work focus metrics, engineered real-time dashboard visualization widgets, and handled Firebase Crashlytics for a 360-degree employee monitoring and productivity evaluation application.
